Little Kids

Kangaroo in a Tree!

Why do you think crabs have claws?

Male crabs show off their claws to impress female crabs. Some crabs use their claws to catch food or to dig.

QUIZ

LITTLE KIDS BIG QUIZ!

1 What starts from a seed?

2 Find all the animals with four legs.

3 Which things start with a *b* sound?

BAIBAZ, ADOBE STOCK (WATERMELON); PIXEL-SHOT, ADOBE STOCK (CUPCAKE); PAKETESAMA, ADOBE STOCK (BIKE); ERIC ISSELÉ, ADOBE STOCK (FOX); DMITRY, ADOBE STOCK (SALAMANDER); NYNKE, ADOBE STOCK (OSTRICH); PATRYK KOSMIDER, ADOBE STOCK (ZEBRA); MONTECILLLO, ADOBE STOCK (CLOCK); FOTOMAS-TER, ADOBE STOCK (BISON); VALERY121283, ADOBE STOCK (BANANAS); ERIC HOOD, ADOBE STOCK (BLUE CRAYON); MAKES PEOPLENO, ADOBE STOCK (BLUEBERRIES)

That's Cool!

Meet the black-tailed prairie dog.

Prairie dogs are related to squirrels. (They are not dogs!)

Prairie dogs kiss and sniff to greet each other. They share food and groom each other.

Hundreds of prairie dogs live together in a group called a town. They dig tunnels underground, where they sleep and stay safe from predators.

**PRAIRIE
DOG TOWN**

Prairie dogs live in a country called the United States. Find the United States on the map on the back page.

NAMING

What in the World Are These?

_OG

_OWTIE

_IZARD

_HOES

_EER

_RESENT

_UTTERFLY

_MBRELLA

_EACOCK

Can you name some other things with spots?

Kangaroos in the Trees

Some kangaroos live on the ground. But the kangaroos here are different. They live in tall rainforest trees. They are called tree kangaroos.

Some tree kangaroos live in a country called Australia. Find Australia on the map on the back page.

es!

Tree kangaroos have larger front legs than kangaroos that live on the ground.

Thick fur keeps tree kangaroos warm and dry.

Tree kangaroos sleep curled up in trees.

Strong arms and legs help these kangaroos climb to the treetops.

Curved claws give them extra grip.

Their long tail helps them balance, even on wobbly branches.

Yum! Tasty leaves, fruit, and flowers are up here.

Hello, world!
Tree kangaroos
are even born in
the trees. Babies
grow up inside
of Mom's pouch.

Kanga-who?

Meet these tree
kangaroo cousins that
live on the ground.

SAY MY NAME:
an-TIH-loh-pine

**ANTILOPINE
WALLAROO**

**WESTERN GRAY
KANGAROO**

**EASTERN GRAY
KANGAROO**

RED KANGAROO

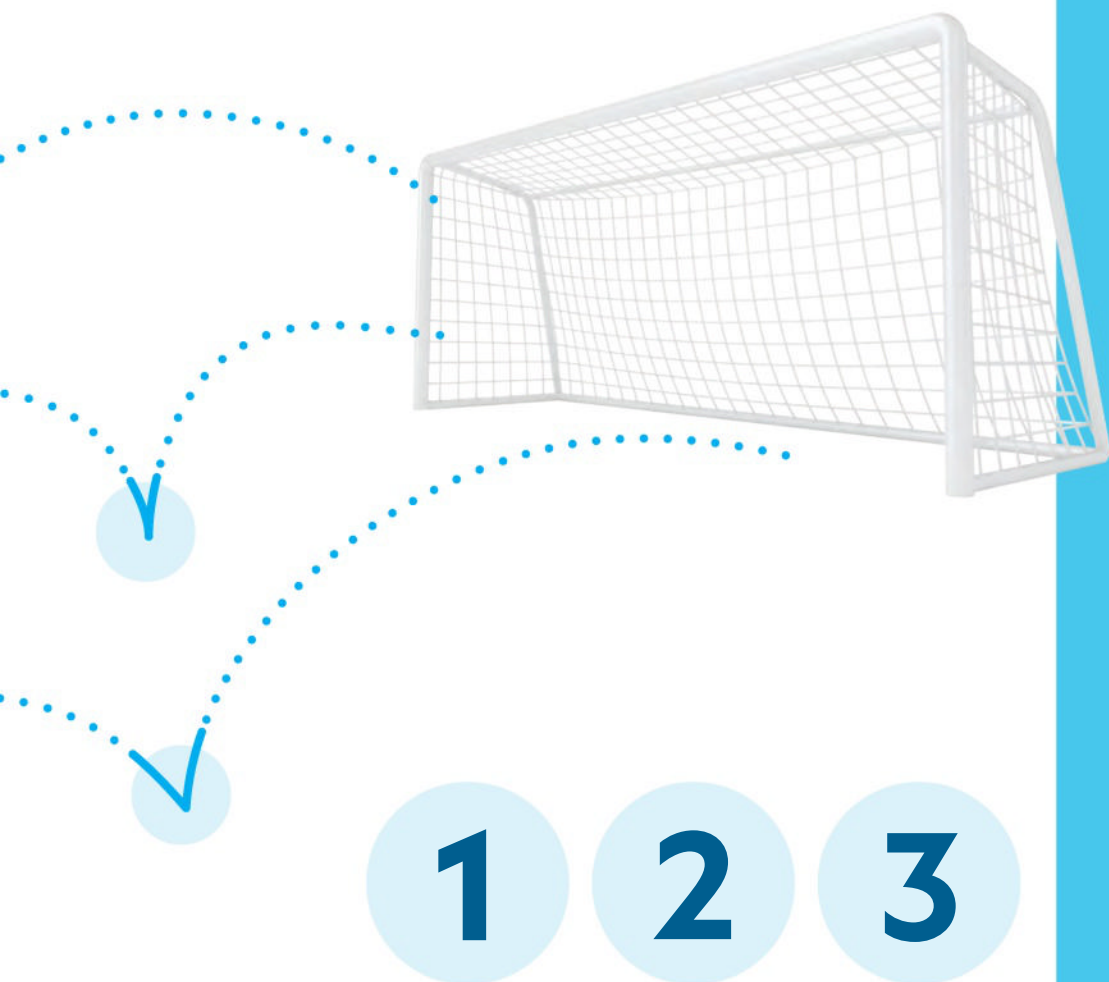

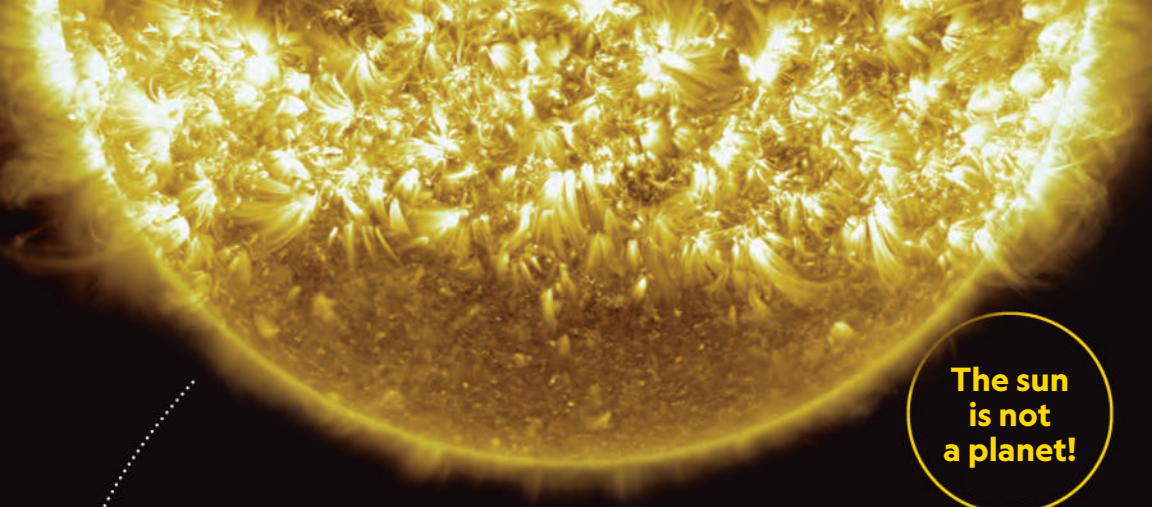

Bouncing Balls

The dotted lines below show the paths each soccer ball will take to the net.

Count the number of times each ball bounces. Match it to one of the numbers on the bottom of this page.

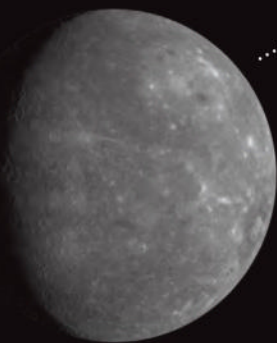

The sun
is not
a planet!

Planets!

You live on a planet called Earth. It moves around the sun. Seven other planets move around our sun, too.

Mercury is the smallest planet, and it is closest to the sun. In the past, giant rocks slammed into Mercury. This created holes called craters on the planet's surface.

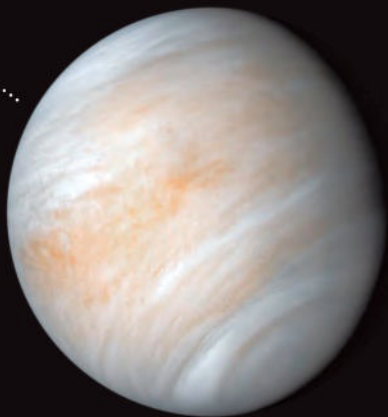

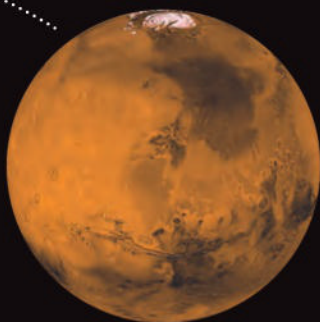

You're on **Earth**. This planet is special because it has air we can breathe and water that covers most of its surface. Earth is the only planet known to have living things: plants, animals, and *you!*

Earth has **one moon**. Some planets do not have a moon. Some planets have many moons. Saturn has **274 moons!**

Feeling hot? **Venus** is covered in clouds that hold in heat like a blanket. This makes it the hottest planet. Venus is also the brightest planet in the sky.

Mars is called the red planet because minerals on its surface are red. Some spaceships have been to Mars.

All the other planets could fit inside of **Jupiter**, the largest planet. Jupiter has a big storm on its surface called the Great Red Spot that has been happening for hundreds of years.

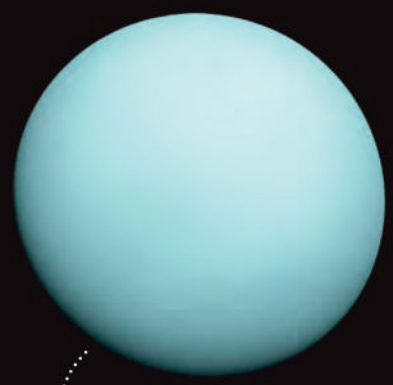

NASA/JPL/JUSS (MARS); ENHANCED IMAGE BY KEVIN M. GILL (CC-BY) BASED ON IMAGES PROVIDED COURTESY OF NASA/JPL/SWRI/NSSS (JUPITER); NASA/JPL (SATURN, URANUS, NEPTUNE)

Look at the rings around **Saturn!** These rings are made of ice and rocks. They circle this planet like a Hula-Hoop.

Neptune is the farthest planet from the sun. It is also the windiest planet in the solar system.

Brr! **Uranus** is the coldest planet. Gases give this planet its blue-green color.

FIND THE SOUND

Say what's in each picture out loud. Point to all the things that start with the *br* sound.

Example: brush

BREAD

SCISSORS

BROOM

BRICK

BEACH BALL

OUND

WHISTLE

BRACELET

TOY ROBOT

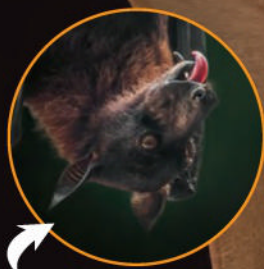

BRAIDS

FLYING FOX

This is not a fox or a bird. A flying fox is a bat! During the day, flying foxes hang from trees. At night, they fly in the sky to search for flowers and fruit to eat.

This bat uses its rough tongue to peel and lick fruit.

Large eyes help it see in the dark.

Grippy feet
and long
claws let the
flying fox
hang from
tree branches
to rest.

Many flying
foxes live in a
country called
Indonesia.
Find Indonesia
on the map on
the back page.

A thin layer
of skin covers
the bones
and muscles
in its wings.

A clawed
thumb helps
the bat hold
on to fruit and
tree branches.

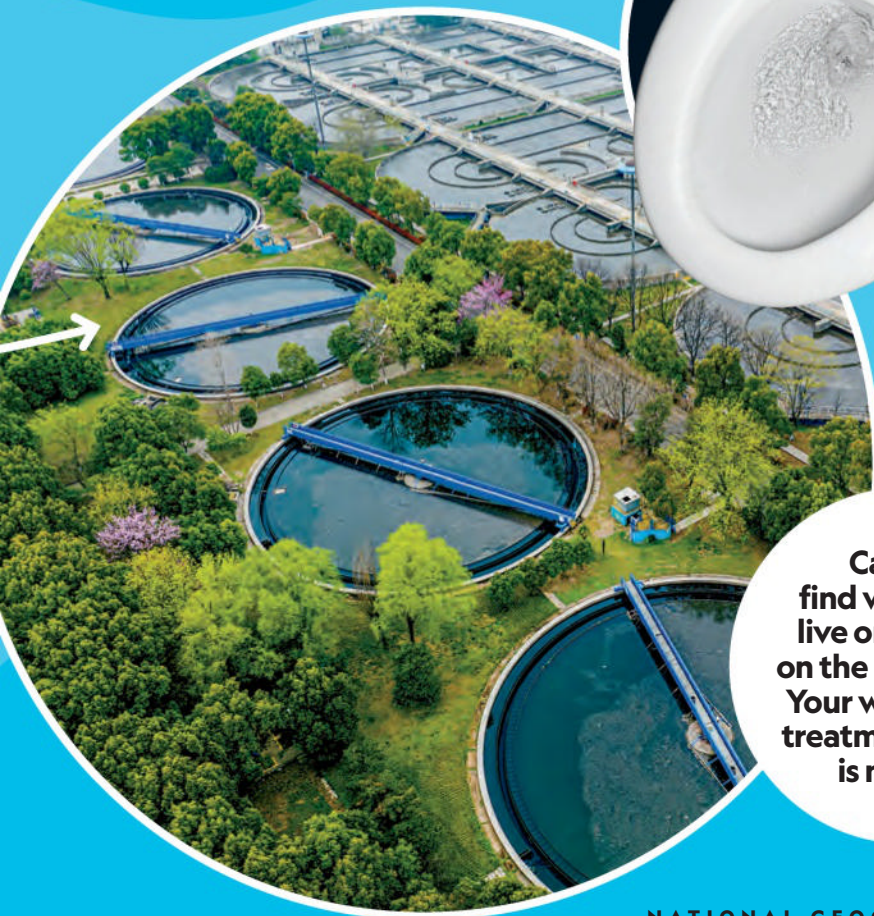

The bat's wings have
bones sort of like the ones
in your arms and hands.
But its finger bones are
much longer than yours.

WHERE DOES MY TOILET WATER GO?

Whoosh! After you flush the toilet, shower, or wash dishes, your water probably travels through pipes in your home to a sewer under the street. Then the water flows to a place called a wastewater treatment facility.

Here, trash, waste, and other dirty stuff is removed from the water. The water is cleaned over and over until it is safe enough to drink. Finally, the water is released into a nearby lake or river.

POILET WATER GO?

**Can you
find where you
live on the map
on the back page?
Your wastewater
treatment facility
is nearby!**

Go, Otter, Go

Follow the directions below to help this river otter find its friends.

START

- 1** Slide toward the muddy hill.
- 2** Go up and over the log.
- 3** Scooch under the brush.
- 4** Swim across the river.

A circular inset image showing a large, moss-covered log lying on the ground in a forest. The log is covered in bright green moss, and the background shows more forest foliage. The image is framed by a thick yellow border.

LOG

A circular inset image showing a muddy, brown hill or mound in a river. The water is murky, and the hill is made of dark, wet mud. The image is framed by a thick yellow border.

MUDDY HILL

o!

Where
do you like
to swim
with your
friends?

RIVER

BRUSH

Hello,
friends!

END

WILD CARDS

BROAD-BILLED HUMMINGBIRD

broad-billed hummingbird

FUN FACTS

**This hummingbird is only
about as long as a playing card.
Its call sounds like *chtt-chtt-chtt*.
The male is more colorful
than the female.**

DANITA DELMONT, SHUTTERSTOCK

WILD CARDS

PORCUPINE

porcupine

FUN FACTS

A porcupine has sharp quills on most of its body. The quills help protect it from animals that might want to eat it.

MARTIN MARITZ, DREAMSTIME

BROWN BEAR

brown bear

FUN FACTS

Brown bears eat mostly plants. They like grasses, roots, and berries. They also sometimes eat meat.

LINDA BAIR, DREAMSTIME

WILD CARDS

NATIONAL
GEOGRAPHIC
Littlekids

MUSK BEETLE

musk beetle

FUN FACTS

**There are about
400,000 different kinds
of beetles. The musk
beetle is one of a group
called long-horned beetles.**

MAREK R. SWADZBA, SHUTTERSTOCK

WILD CARDS

MOUNTAIN LION

mountain lion

FUN FACTS

A mountain lion has many names. It is also called a puma, cougar, panther, and catamount. Scientists usually say puma.

MOOSE HENDERSON, DREAMSTIME

WILD CARDS

PAJAMA CARDINALFISH

pajama cardinalfish

FUN FACTS

A father pajama cardinalfish holds his eggs in his mouth until they hatch. This fish is a popular pet for people who have aquariums.

ANTOS777, SHUTTERSTOCK
